ChildPlus Online Performance Panel Explanation

Richard Woolf - 2026-05-07 - [ChildPlus](#)

ChildPlus Performance Panels:

The Performance Panel provides a visual compilation of MVCDC's real-time data in one place. You can use the Performance Panel to:

- View multiple key compliance data indicators, which are aligned with the Head Start Program Performance Standards
- Identify trends and concerns with MVCDC's data
- Visualize key indicator
- Quickly share information with key stakeholders
- Real-time data
- One comprehensive view

TRAINING VIDEO:

UPDATES:

ChildPlus has made updates to ChildPlus Online and the Performance Panels since this video was created:

- ChildPlus now has the option to show the modules across the top in a banner rather than in a drop-down menu, if you are viewing ChildPlus Online in a large screen format, such as a tablet or a laptop. Small screens, such as a mobile phone or small tablet, will still use the drop-down menu format exclusively. To change how your menu is displayed, in the person icon in the top right corner of the page, then select MENU LAYOUT.
- If you would like to see more details about how the data for a specific indicator is being pulled from the database, you can click on the INFORMATION button within each indicator. The INFORMATION button looks like a small letter i inside a circle.
- It is now possible to export the entire Performance Panel within one PDF file. Or you can choose to export individual indicators separately, if that is desired. To export individual indicators, click into the specific indicator and then export it to a PDF file.
