## How can I tell if my iPad is connected to Wi-Fi/ the Internet?

Richard Woolf - 2024-03-04 - [iPhones & iPads](#)

1. Go into the SETTINGS app (which can be found in the IT Support folder)
2. Select Wi-Fi from the left side of the screen near the top
3. Make sure that MVDC-HS is selected. That will ensure that your device is connected to your Wi-Fi network. When it's connected you should see a blue checkmark next to the MVDC-HS name.
4. Get out of the SETTINGS app (by clicking once on the iPad button)
5. Go into the SPEEDTEST app
6. Click on the GO circular button (You may need to X out of first screen if you do not see the GO button).

This will test your Internet access speed. If you get any results, then you have a verified connection to the Internet
