## How to set up Microsoft Authenticator on a New Phone

Richard Woolf - 2023-09-26 - [Authenticator](#)

In this video, you'll learn how to re-register a new phone using the **Microsoft Authenticator** app.

Once the two-factor security has been set up for your Office 365 work account you may receive a push notification from the authenticator app asking you to approve the login. One you approve you can access your Office 365 account. Or, you may be asked to provide a 6-digit code from the Authenticator app.
