Why are there County Numbers instead of names in ChildPlus?

Richard Woolf - 2025-02-27 - [ChildPlus](#)

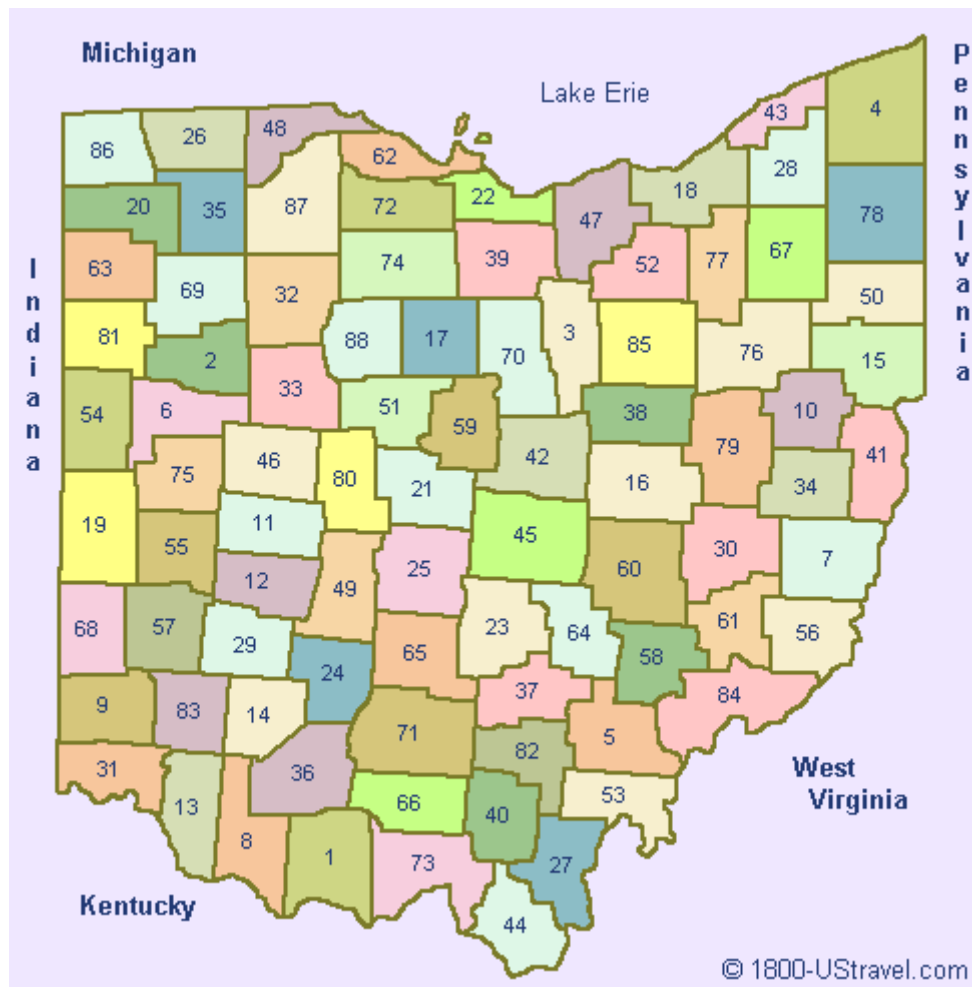

ChildPlus Uses County Numbers

When you enter a zip code into an address field in ChildPlus, the city, name and county number should automatically added to your record. This is why it is best practice to always enter the zip code first before the city field.

ChildPlus uses a number code for each zip code in Ohio. **You should not change this county number to the actual name of the county.**

Adding Zip Codes to ChildPlus

If you notice a zip code where the city and county number are not automatically added, please submit a ticket with that zip code and it will be added to the ChildPlus database.
