COR Advantage Transitioning to Kaymbu

2023-11-09 - Richard Woolf - [Database](#)

The COR Advantage app and the Kaymbu app are consolidating into a single, streamlined application.

News for COR Advantage App Users: Transitioning to the Kaymbu App

We're simplifying things by [transitioning you and your team to the Kaymbu Application](#). Your account, data, and login info all stay the same.

For some added context, our team has been managing two very similar apps, COR Advantage and Kaymbu, over the last few years. The technology of Kaymbu has powered both apps. We aim to give you the best experience possible, so we're concentrating our efforts on supporting a single application - Kaymbu. This means quicker updates and features while preserving everything you love and use in the COR Advantage App.

Managing Observations and Moments

Friendly reminder about managing observations in Kaymbu with COR Advantage! Don't forget you can upload photos, videos, and anecdotes through the Drafts page or the New Observation page. If you're using the Assessment Dashboard, you can track completion percentages and spot any missing observations. Using the Assessment Dashboard won't automatically share observations with families. Explore the options for editing or adding observations and follow the steps to manage them in [this guide](#).
