Incoming Spam Alert! Be vigilant.

2024-02-15 - Richard Woolf - [Outlook Email](#)

Hello all,

From time to time, you may receive emails like the one below pretending to be from Microsoft or Office365 and advising you of issues with your account. These are spam/phishing emails. All of your email/ Office365 accounts are managed internally by our IT department and all issues are taken care of at that level. **Do not click on/respond to such emails.** When in doubt, forward to me to examine.

Thanks.

Ryan Hardesty

Director of IT and Data Systems

Incoming Mails Notification

Attention!

Your storage space is running low. Outlook mail server noticed you have 15 held incoming emails. In order to receive new messages, follow the instructions below to rectify the issue.
