## Link to ChildPlus Online

2023-08-07 - Richard Woolf - [Database](#)

## Hello all ChildPlus users!

We have added a link to the online version of ChildPlus to the Quick Links section of the Intranet. This is not the attendance app but the full ChildPlus software in its new online version. Some of you may have already used this but most have probably not had much, if any, experience with the online version. ChildPlus plans to move exclusively to the online version within the next couple of years, and even now all new features are ONLY appearing in the online version and not the desktop version.

As a result, we are going to be ramping up some online ChildPlus training over the next few months so that people can gradually transition their work to that platform, or at least be more prepared when ChildPlus finally flips the switch and closes the desktop version for good.

If you click on the link, it takes you to the online version. The first time in you may need to put in the agency ID. The agency ID is MiamiValley - just like that. Then you only need to enter your regular ChildPlus credentials. Note that the first time you do this it will need to send a confirmation email.

Thanks,

**Ryan Hardesty**

Director of IT and Data Systems
