MVCDC Support

Network Out Tuesday Evening (02/13) for Upgrade

2024-02-05 - Richard Woolf - [General](#)

UPDATE:

Hello everyone

This is just a reminder that the MVCDC network will be down after 6:00 pm tomorrow night (February 13, 2024). We are upgrading the network, which requires it to be taken offline during that process. Everything should be up and running again (new and improved) by Wednesday morning.

Thanks

Ryan Hardesty
Director of IT and Data Systems

UPDATE:

Due to a training at the admin building tonight, we have

rescheduled the network upgrade until 6 PM Tuesday, February 13th. At that point, the network will be down until Wednesday morning.

Thanks,

Ryan Hardesty
Director of IT and Data Systems

Hello everybody.

 After 6 pm on Tuesday, February 06, the MVCDC network will be down for most of the evening due to a network upgrade at the Admin building. This will mean no access to the agency internet from our various locations until Wednesday morning. All systems should be functional again by Wednesday morning.

 Thanks,

Ryan Hardesty
Director of IT and Data Systems
