New ChildPlus Communication Tool

2026-06-04 - Richard Woolf - [Database](#)

Now Available: **Two-Way Communication in ChildPlus!**

**We're excited to announce the launch of
the ChildPlus Communication App!**

**It's designed to make two-way communication between families and
Head Start staff more streamlined than ever!**

How it Works:

Secure, Effortless Two-Way Communication!

Through a module in ChildPlus Online, staff can easily send critical updates and instant messages to parents/guardians. Through the ChildPlus Communication mobile app, parents/guardians can view these messages and respond to staff directly to ensure a secure and private communication channel.

Send Photos and Files Instantly

In addition to sending instant messages throughout the day, staff can easily send images and important files as well to engage with parents/guardians better than ever.

Flexible Messaging Options

Staff can message multiple families in a mass group message and manage each response separately in private message threads. Parents/guardians can also choose to message specific staff members, or all staff associated with their child.

Explore Two-Way Communication in ChildPlus Online now!
